Quick Start for Ring Stewards

Run your ring's live running order. Competitors and spectators see every change right away.

- Get the Event # and Ring Steward PIN from the event secretary.
- Stay connected (Wi-Fi or mobile data) all day.
- Several stewards can run the same class, each on their own device.

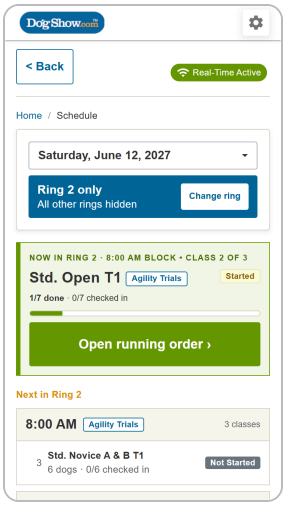

1 Link the event

Install **Ringside by DogShow.com**. Under **Ring Steward Access**, tap **Link Event**, enter the Event # and PIN, then tap **Go**.

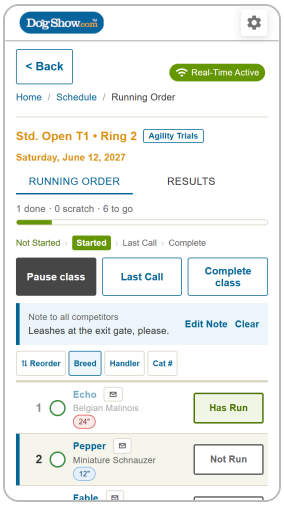

2 Your ring

Tap **Pick your ring**. You'll see the class **Now in Ring** and the ones next. Tap **Open running order**.

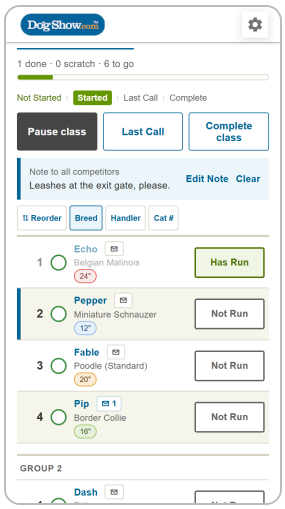

3 Run the class

Start class, **Pause class** (with a reason), **Last Call** and **Complete class**. You can notify competitors at the start and at Last Call.

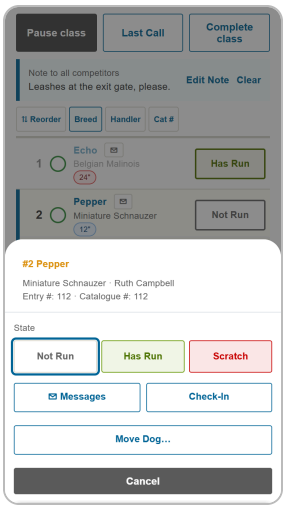

4 Your dogs

Tap the circle to check a dog in. Tap the status to go from **Not Run** to **Has Run** to **Scratch**.

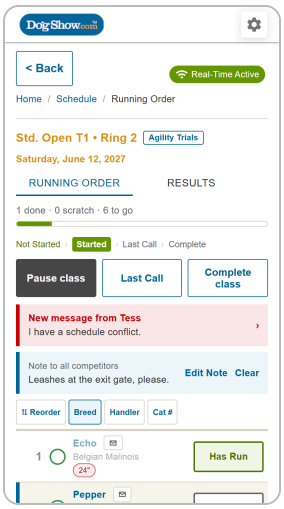

5 Change the order

Tap a dog for its card and **Move Dog**, or tap **Reorder** and drag by the ☰ handle. Move **Unassigned** dogs into the order.

6 Messages

A red banner shows a new message. Tap it to read and reply. Add a **Note to all competitors** or **Send Message To Competitors**.

Tip: set the class to **Last Call** and wait a moment before **Complete class**. Competitors who are running late often message you.
